

Air Permitting Workshop
September 28, 2018 from 1:00pm – 3:30pm
San Diego Convention Center
34th Annual Environmental Training Symposium and Conference

IEA's Air Permitting Workshop is designed to expand your knowledge, whether you are new to air permitting or a seasoned professional. Air Permitting 101 will take you through the ins and outs of the permitting process, including:

- Determining if you need an air permit and identifying possible exemptions
- Discussing permitting strategy and avoiding permitting hurdles
- Putting together the permit application package
- Helping to expedite and streamline the APCD processing of your application
- Setting up the permit for compliance
- Managing the Permit to Construct, Startup Authorization and Permit to Operate stages
- Establishing processes to achieve and maintain compliance with your Permit to Operate

The second part of the training will focus on specific elements of permit application preparation as demonstrated through a series of case studies. The primary elements covered include:

- Best Available Control Technology Evaluation
- Health Risk Assessment Screening and some Modeling aspects
- On-Line Application Submittal Options
- Emission Calculations and Analyses

The training will include interactive Question/Answer sessions. Senior Staff from the following organizations will lead the workshops:
